

Relaxing in Jordan – 6 days

Amman - Ma'in Hot Springs - Petra - Dead Sea

Day 1: Arrival at Queen Alia International Airport – Amman.

Our representative welcomes you at Queen Alia International Airport and assists you through the formalities of immigration and customs. You will then be transferred to your hotel in Amman for overnight.

Day 2: Amman – Ma'in Hot Springs.

After breakfast you will be transferred to a series of natural hot springs and waterfalls, with biblical connections, located between Madaba and the Dead Sea. The springs still run hot today and the site is now home to a modern Spa resort, which provides a full range of services. The main waterfall, which gushes over a cliff beneath the resort, ranges in temperature from 40° to 60° C (104-140° F). There are hot pools and several smaller falls nearby, you will overnight in Ma'in.

Day3: Mai'n Hot Springs- Petra Full day – Dead Sea.

After breakfast, you will be driven to start discovering Petra, renowned as the most famous and the most exceptional site in Jordan. This ancient city is the legacy of the Nabateans, an Arab people settled in Jordan over 2000 years ago. It is today one of the 7 New Wonders of the World. There, you will admire the Khazneh, also called the "Treasury", as well as the Amphitheatre, the Royal Tombs, the Monastery and many other amazing buildings carved in the rock. After this wonderful visit, you will be transferred to the Dead Sea for overnight.

Day 4: Dead Sea.

After breakfast, spoil yourself at your luxurious hotel and enjoy the special treatments and massages offered there. You will discover a private beach opening to the Dead Sea, where you will be able to cover yourself with a unique revitalizing black mud and where you can let the salty water carry you. Enjoy the incredible buoyancy effect!

The Dead Sea area has become a major center for health research and treatment for several reasons. The mineral content of the water, the very low content of pollens and other allergens in the atmosphere, the reduced ultraviolet component of solar radiation, and the higher atmospheric pressure at this great depth each have specific health effects. The Salts are ideal for softening skin, providing relief from psoriasis, soothing aches and pains, easing muscle tension and aiding detoxification.
